PRODUCT OVERVIEW

SiteBox Mini

Compact monitoring equipment for entrances, small sites and temporary installations.

Engineering concept render. Physical configuration remains subject to validation.

Typical applications

Small construction sites, entrances, temporary equipment areas and commercial premises.

Document revision: 3C1DE73A6355
Issued: 21 November 2026

ENGINEERING INFORMATION

Technical specifications

Specification	Proposed configuration
Enclosure	Compact industrial enclosure
Installation	Fixed or relocatable mounting
Camera system	Configurable IP camera integration
Power supply	External DC supply or battery option
Connectivity	Ethernet, Wi-Fi or optional 4G
Processing	Local or central computer vision
Storage	Local storage option
Expansion	Optional motion and environmental sensors
Protection	Outdoor-rated enclosure target; rating pending validation

Key capabilities

Compact installation
Designed around locations where a large monitoring station would be impractical.

Flexible camera integration
Camera placement and field of view can be configured for the intended observation area.

Connected operation
Proposed local recording and remote reporting options.

This document describes an engineering configuration under development. Specifications, performance, component selection and availability remain subject to validation. No certification is implied.
